  - Peter Drucker contributed
- How the right measures help teams excel.
Balanced Scorecard

- **Focus** -- Ensures an organization is doing the right things - not simply doing things right (helps avoid concentrating on perfecting a process that has little impact on critical outcomes).
- **Alignment** -- Creates links between and across levels of your organization (particularly helpful to improve an issue that cuts across functional silos).

- **Accountability** -- Spans departments and individuals (identifies what is strategically important, what performance level is needed, and who is responsible).
- **Communication** -- Translates your high-level strategy into words that are meaningful and relevant throughout the organization.
